DETAILED ACTION

Response to Amendment

1. In response to the Office Action mailed September 30, 2008, applicant submitted an amendment filed on November 13, 2008, in which the applicant traversed and requested reconsideration.

Response to Arguments

2. Applicant's argue that the prior art cited does not specifically teach decomposing said input wideband speech signal into a voiced portion and a noisy portion using an adaptive separation component having a filter cut-off frequency, wherein said voiced portion is a portion of said input wideband speech signal for waveform matching and said noisy portion is a portion of said input wideband speech signal not for waveform matching, and wherein said filter cut-off frequency is above 4 kHz. Applicant's arguments are persuasive.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-11,13,15,17-27,29,31,33-36,39-43,46,48,49 and 55-56 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

. Claims 1-11,13,15, 40-43,46,48,49 and 55-56 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims

Art Unit: 2626

recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular manufacture or a machine), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claims 17-27, 29, 31, 33-36, 39 and 51-54 are directed towards "an apparatus". The disclosure has defined the "apparatus" as software/program data (e.g. page 11, lines 6-11). Therefore, the claims are directed towards mere functional descriptive material, i.e., a disembodied program.
